

BIKE LOCKERS

Bike Vault[®]

FIBERGLASS COMPOSITE BICYCLE LOCKERS

Bike Lockers, Bike Rooms and Bicycle Storage Facilities are the three most secure ways to achieve **Class 1 long-term bike parking**. Making the correct choice depends on budgets, available space and location. Decisions might also change if it is new construction vs. an existing landscape. Bike Lockers are a better choice on Retro projects where space constraints are problematic. We will supply your CAD layouts, work with ordinances, and make sure the job is completed on time and on budget.

Fully assembled. Understanding the importance of time, installation with no assembly just makes sense.
