

BIKE RACKS

Base Station™

FREESTANDING BIKE RACK BASE

The Freestanding Vertical Base Station removes some of the limitations from vertical bike parking. No longer are the days when you need a supported wall to anchor vertical racks. Our signature Freestanding Vertical Base Station can be placed in the middle of any room, making it a great option for bike rooms and bicycle storage facilities. Just choose your vertical bike racks and attach them to the station.

This product replaces both the Sidestage and the Centerstage. All spec sheets can be interchangeable since the dimensions are the same
