

BIKE RACKS

VR1 XL Offset[®]

VERTICAL BIKE PARKING RACKS

The VR1 XL is the second generation of Vertical racks. With its large profile tire hook and wheel ramp, it will accommodate any sized bicycle tire with ease. The $\frac{3}{4}$ " steel locking loop offers 3 points of contact for the highest locking security. The VR1 is the most versatile vertical rack around and we suggest you have at least one in every bike room. Check out our new [bike room builder tool](#) and layout a bike room in seconds.
